

Chairs And Stools: Measurements For Seating

TITLE

Measurements for common residential furniture (zhuzhai zhong changyong de jiaju chidu 住宅中常用的家具尺度)

DATE

1959

CREATOR

China Architectural Society (Zhongguo Jianzhu Xuehui 中国建筑学会)

PUBLISHER

Architectural Journal (Jianzhu xuebao 建筑学报), Issue 9/10: 76.

RIGHTS

China Architectural Society. Fair use.

DESCRIPTION

These drawings specify measurements for different seating types presumed to be used in urban dwellings. They include a stool, sofa, armchair, and a foldable chair. The image captions explain that these measurements assume that a person has an average height of ca. 169cm.
